TO ALL TO WHOM THESE PRESENTS SHALL COME:

Sakata Seed Corporation

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED DISTINCT VARIETY OF SEXUALLY REPRODUCED, OR TUBER PROPAGATED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF TWENTY YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR CONDITIONING IT FOR PROPAGATION, OR STOCKING IT FOR ANY OF THE FOREGOING PURPOSES, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

GENERAL: To be effectively filed with the Plant Variety Protection Office (PVPO), ALL of the following items must be received in the PVPO: (1) Completed application form signed by the owner; (2) completed exhibits A, B, C, E; (3) for a seed reproduced variety at least 2,500 viable untreated seeds, for a hybrid variety at least 2,500 untreated seeds of each line necessary to reproduce the variety, or for tuber reproduced varieties verification that a viable (in the sense that it will reproduce an entire plant) tissue culture will be deposited and maintained in an approved public repository; (4) check drawn on a U.S. bank for \$3,652 (\$432 filing fee and \$3,220 examination fee), payable to "Treasurer of the United States" (See Section 97.6 of the Regulations and Rules of Practice.) Partial applications will be held in the PVPO for not more than 90 days, then returned to the applicant as unfilled. Mail application and other requirements to Plant Variety Protection Office, AMS, USDA, Room 401, NAL Building, 10301 Baltimore Avenue, Beltsville, MD 20705-2351. Retain one copy for your files. All items on the face of the application are self explanatory unless noted below. Corrections on the application form and exhibits must be initialed and dated. **DO NOT** use masking materials to make corrections. If a certificate is allowed, you will be requested to send a check payable to "Treasurer of the United States" in the amount of \$432 for issuance of the certificate. Certificates will be issued to owner, not licensee or agent.

ITEM

- 19a. Give:
- (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method;
 - (2) the details of subsequent stages of selection and multiplication;
 - (3) evidence of uniformity and stability; and
 - (4) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified
- 19b. Give a summary of the variety's distinctness. Clearly state how this application variety may be distinguished from all other varieties in the same crop. If the new variety is most similar to one variety or a group of related varieties:
- (1) identify these varieties and state all differences objectively;
 - (2) attach statistical data for characters expressed numerically and demonstrate that these are clear differences; and
 - (3) submit, if helpful, seed and plant specimens or photographs (prints) of seed and plant comparisons which clearly indicate distinctness.
- 19c. Exhibit C forms are available from the PVPO Office for most crops; specify crop kind. Fill in Exhibit C (Objective Description of Variety) form as completely as possible to describe your variety.
- 19d. Optional additional characteristics and/or photographs. Describe any additional characteristics that cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the characteristics that are difficult to describe, such as plant habit, plant color, disease resistance, etc.
- 19e. Section 52(5) of the Act requires applicants to furnish a statement of the basis of the applicant's ownership. An Exhibit E form is available from the PVPO.
20. If "Yes" is specified (seed of this variety be sold by variety name only, as a class of certified seed), the applicant **MAY NOT** reverse this affirmative decision after the variety has been sold and so labeled, the decision published, or the certificate issued. However, if "No" has been specified, the applicant may change the choice. (See Regulations and Rules of Practice, Section 97.103).
23. See Sections 41, 42, and 43 of the Act and Section 97.5 of the regulations for eligibility requirements.
24. See Section 55 of the Act for instructions on claiming the benefit of an earlier filing date.

22. CONTINUED FROM FRONT (Please provide a statement as to the limitation and sequence of generations that may be certified.)

A PBR application was filed in Japan, after the U.S. PVP application was filed. The filing date was December 9, 2004 and the application number is 17731.

23. CONTINUED FROM FRONT (Please provide the date of first sale, disposition, transfer, or use for each country and the circumstances, if the variety (including any harvested material) or a hybrid produced from this variety has been sold, disposed of, transferred, or used in the U.S. or other countries.)

March 24, 2004 US sale to Ball Seed Co. for resale

24. CONTINUED FROM FRONT (Please give the country, date of filing or issuance, and assigned reference number, if the variety or any component of the variety is protected by intellectual property right (Plant Breeder's Right or Patent).)

NOTES: It is the responsibility of the applicant/owner to keep the PVPO informed of any changes of address or change of ownership or assignment or owner's representative during the life of the application/certificate. The fees for filing a change of address; owner's representative; ownership or assignment; or any modification of owner's name is specified in Section 97.175 of the regulations. (See Section 101 of the Act, and Sections 97.130, 97.131, 97.175(h) of the Regulations and Rules of Practice.)

Exhibit A

In April 1999, several *Coleus blumei* breeding lines from a large leaf germplasm collection were grown out in Japan by Sakata Seed Corporation. These lines all derive from commercially available *Coleus* varieties Sakata developed in previous decades. Precise documentation of the original source genetics has been lost due to the germplasm program having sporadic starts and stops. The origin of the source genetics for the new variety is most likely from the 'Extra Selected Large Leaved Fancy Colored Mix Strain' offered by Sakata in 1953 or the individual color large leaved varieties added to the catalog in 1954 and 1961, plus crossing to dwarf habit varieties from the Superfine Rainbow series, which is still marketed by Sakata. The lines selected in 1999 were not fixed for habit or leaf color traits. Plants were grown in the field and in August 1999, selections were made for various leaf colors and color patterns, dwarf habit, late flowering time, large leaves, and tolerance to leaf burning while in direct sun. One selection with rose leaf centers surrounded by a bright green margin was designated SK2-9. During 2000 and 2001 the selection was repeatedly selfed and selected for these traits. During 2002, the selection was trialed and stability of characteristics was confirmed. SK2-9 has been designated with the variety name 'Kakegawa CE14'. When compared to the original selection from the germplasm bank, this variety has a more dwarf habit, later flowering time, larger leaves, more tolerance to the sun and trait stability.

The variety 'Kakegawa CE14' has been observed for two generations of increase and is stable and uniform. Variants appear in 'Kakegawa CE14' at a frequency of about 1%. These variants have small leaves but are identical to the variety in all other characteristics as described in Exhibit C. These variants are known to be the result of spontaneous mutation due to aneuploidy. This type of mutation occurs in most, if not all, *Coleus* and is a characteristic of the species. These variants are commercially acceptable and predictable.

Exhibit B

'Kakegawa CE14' is most similar to the coleus plant Wizard™ Sunset based on the overall number of similar ornamental characteristics including plant habit and type. In addition, Wizard™ Sunset is well known and is representative of what is commercially available from seed. The primary value of 'Kakegawa CE14' is leaf size as measured by leaf width and length. Leaf color can be used to distinguish 'Kakegawa CE14' from the concurrently filed varieties developed for this new series of coleus.

Comparison of Wizard™ Sunset and 'Kakegawa CE14' Leaf Width and Length

Ten greenhouse 4 1/2-inch pot plants of each variety were evaluated for leaf size measured as width and length. Plants were grown in the summer of 2004 at the PanAmerican Seed facility located in Elburn, IL. In a second trial, ten field-grown plants of each variety were evaluated. Plants were grown in the summer of 2004 at the PanAmerican Seed facility located in Elburn, IL. For both trials, fully-expanded leaves were measured from the third node below the sepals. Data was analyzed using the t-test and results are represented in the charts below. Data from these trials indicate that 'Kakegawa CE14' has significantly wider and longer leaves when compared to Wizard™ Sunset. Leaf color was recorded using the RHS Colour Charts during daylight conditions.
